

People should be entitled to the information provided by XM radio without lawmakers, who we pay for, telling us what is ok and whats not. The airwaves are public domain and should remain that way. The Howard Stern radio show, which has been greatly affected by threats by the FCC, should also be entitled to proceed like before without interference. You can always choose NOT to listen. Free speech seems to be what the FCC stands against.

Don't make the US like other countries. Let us have our freedoms and leave our entertainment alone.
